WORK HISTORY

Lead FrontEnd Web Developer
Tonic Fusion LLP, UK. Web Design and Digital Marketing.
Since May 2021,

- Key responsibilities include: working with a team of user researchers, content and interface designers and back-end developers to Build accessible and performant web interfaces across devices and browsers for many users regardless of their needs.

- Conduct technical analysis on web services to determine areas for performance improvements, Accessibility, and Best practices. In cases where clients depend on Ads, I explore best SEO practices to drive progress and development processes.

- Reporting of time management per project improves product service delivery by more than 50% by focusing on critical areas and ensuring projects meet desktop and mobile platform standards through integrated testing.

- Led the development of multiple enterprise-level web services like UHSports (University Of Hertfordshire Sports), Blackphone Privy2, Lonsdale Financial Services, and many more, resulting in a high percentage increase in user experience, page experience, and reduced bounce rates.

- Continuous technical analysis for web services like Lonsdale Services UK, Brasstack Fittings UK, Fortune Financial UK, and Complete Tenders UK resulted in a massive boost to SEO, Performance and User Accessibility, with a minimum of 85% increase in consumer conversion, retention and engagement.

- Implement fixes and integrate new features on CivilService College, Amporshe Services & Engine Build Specialist UK, Barkleygreen UK, and Deeset UK web services, enabling in-depth improvement to user experience.

Web Developer / Product Analyst
Digital Echos, UK.
Nov 2019 - May 2021

- Key responsibilities were developing and maintaining new websites for clients. Projects include building the Puredrinks Company E-Commerce Website with more than 70% on-time delivery while staying under budget.

- Documenting system requirements, user requirements, use cases, user stories, wireframing design, coding and deployment.

- Handled technical issues on websites, ensuring websites were AAA-compliant and Accessible with standard SEO practices.

- A team lead of developers to redesign the Company Website, resulting in a reduction of 20% load times and a 15% increase in user accessibility.

- Transitioned waterfall web development method to a more efficient agile methodology, achieving an 80% increase in client satisfaction, data prediction and web development cycle.

- Executed tests daily, created defect reports and fixed bugs in web applications while ensuring proper documentation and information in all product life cycle stages.

Code Mentor / Reviewer
Udacity Inc. Mountain View & Sans Francisco, CA.
Jun 2016 - Nov 2019
